### How is our school doing overall?

Accountability and assistance levels		School percentile										
Our school	<b>Level 1</b> Meeting gap narrowing goals	School percentiles (1-99) indicate how a school is performing overall compared to other schools that serve the same or similar grades. Our school's percentile is below. Lowest performing <span style="margin-left: 150px;">Highest performing</span>										
Our district	<b>Level 1</b> Meeting gap narrowing goals											
Most <b>schools</b> are assigned a level from 1-5, with those meeting their proficiency gap-narrowing goals in Level 1 and the lowest performing in Levels 4 and 5. A <b>district</b> is typically assigned a level based on the level of its lowest performing school. Placing schools and districts into levels helps districts know which schools need more support, and helps the state know which districts need the most assistance. More information is available here: <a href="http://www.mass.gov/ese/accountability">http://www.mass.gov/ese/accountability</a> .		<b>Overall progress in narrowing gaps</b> Massachusetts aims to reduce proficiency gaps by half between 2011 and 2017.

<b>District determination of need for special education technical assistance or intervention</b> <div style="text-align: center; background-color: green; color: white; padding: 5px; width: fit-content; margin: 0 auto;">Meets Requirements (MR)</div> Districts, including single school districts, are assigned a determination of need for special education technical assistance or intervention. These determinations, which are typically based on the district's accountability and assistance level, range from Meets Requirements (Level 1 districts) to Needs Substantial Intervention (Level 5 districts). The determination level, which incorporates compliance measures also, helps to identify whether the Department will require districts to take additional actions to support improved outcomes for all children, especially students with disabilities.												

### How does our school's achievement over time compare to the district and the state?

The transitional Composite Performance Index (CPI) is a number from 1-100 that represents the extent to which all students are progressing toward proficiency in a given subject. When all students demonstrate proficiency on MCAS and/or PARCC tests, the CPI will be 100. Our school's transitional CPIs for 2013-2016 are below.

### How does our school's growth compare to the district and the state?

Transitional Student Growth Percentiles (SGPs) measure gains in student achievement from year to year. SGPs between 40 and 60 represent moderate growth. Our school's median SGPs for 2016 are below. (Note: Growth values are truncated.)
